

READY, SET, ACTION PLAN: Graphic Organizer (Initial)

Name: _____ Date: _____

Part 1: Math ELM Results (Winter 2017)

	Score and Percentage
Overall	
Number and Sense Data	
Geometry	
Algebra	

Describe one specific challenging problem:

Part 2: Other Math Results (Fall 2016)

SAT Score:	
ACT Score:	
SBAC Math Score:	

University Type	Placed out of Remedial Math? Yes/No
CalState	
UC	
Community College	
Other	

Part 3: Project, Portfolios and POWs

Thinking beyond the standardized tests in Parts 1 and 2, think about other work that you have done so far in high school math. Describe at least two assignments, activities or benchmarks that you feel have helped with your college readiness and explain why. Be specific about the content or the skills (Habits of a Mathematician) that you feel will be of value of you to in college.

Part 6: Study Planning

You will be expected to meet, at least, two times a month with your study group to work through preparing for the test or higher-level material. You will be doing some of this work in class once a month, but do not need to select partners in your own class.

When are you planning to meet outside of class? (i.e. Mondays at lunch, Tuesdays before school, Wednesdays after school)	
Who are you planning to study with? (no more than 3 others – no groups larger than 4 people)	
Where are you planning to study? (i.e. Carlee’s classroom, the 12 th grade commons, the coffee shop down the street)	
<i>Take some time to create a Google Slideshow with your group and look at this attached document for planning your first meeting. Design your first slide and share it with me by Friday, February 3rd!</i>
